GEFEG.Validation.PORTAL

VDA | Verband der
Automobilindustrie

The GEFEG.Portal is an internet-based solution that supports the management of B2B/EDI communities and the on-boarding process of suppliers and customers.

The GEFEG.Portal

- supports the cooperation
- simplifies the on-boarding of new partners
- increases data quality
- supports the roll-out of new messages/versions
- is a tool for data harmonization
- reduces the costs of EDI projects

Use the new GEFEG.Portal to launch new VDA messages such as VDA 4987 GLOBAL DESADV and VDA 938 GLOBAL INVOICE in the automotive industry!

Portal Management

- Graphical preparation of statistics with Excel templates, e.g. what percentage of users have successfully validated the VDA 4987 GLOBAL DESADV
- Adaptation of the highly scalable user interface to the requirements of the community and its work processes
- Group formation according to the organizational structure

Features

- Networking your community in the cloud with an innovative solution via SaaS or in your own IT landscape
- Easy development and delivery of guides for new messages / new versions / mappings for all standards and company interfaces
- Self test of the partners
- High data quality through validation with syntax and semantic rules
- Customizing for the mapping of own requirements
- "White Labeling" possible, to take your corporate design into account

- Significantly shorter project times
- Higher quality data exchange with your partners
- Improved interoperability of your IT solutions
- Reduced costs by optimizing the message design and roll-out process

Use Case:

**Roll-out support for the new
VDA 4987 GLOBAL DESADV**

- Registration of a supplier group with automatic initial email
- Separate work area in the portal for each user
- Up- and downloading of information such as guidelines (in different languages), sample messages and other information
- Supplier interaction with the GEFEG.Portal by viewing and communicating information and validation results
- Logging of activities for statistics
- Sending status information ("successful test of VDA 4987 GLOBAL DESADV") for monitoring

PORTAL
eBusiness Community Management

B2B Design Time Portal						
News	Publication	CRs	Workspace	Validation	Tasks	Admin
News	Communicate with the portal community through the "News" category					
Publication	Users can view and download specifications, guides and other information					
CRs	Users define change requests and view the current status					
Workspace	Users with editing rights see editable elements as a source for delivery in Publication and Validation					
Validation	Users can validate messages. These are tested for compliance with the respective specification					
Tasks	Workflow Management					
Admin	Configuring the portal					

The GEFEG.Portal together with GEFEG.FX covers the complete Message Design Life Cycle.

References

More than 750 customers in 35 countries have long-term trust in GEFEG products. Companies working with GEFEG products are Benteler, BMW, Daimler, Ford, Hella, MAN, Scania, Volvo, VW and Würth. GEFEG is active in other industries, e.g. in the transport and consumer goods industry, and with partners such as World Customs Organization (WCO) and GS1.

More than 12,000 registered users use a GEFEG.Portal for validation.

Contact us to arrange a presentation appointment. We will show you how GEFEG solutions optimize the management of metadata.
