ASC X12

In 1979, the ANSI (American National Standards Institute) commissioned the Accredited Standards Committee (ASC) X12 to develop a uniform standard for the electronic exchange of business documents.

Today, the standard known as ASC X12 is widely used especially in the USA and North America and shapes the EDI landscape of many US companies. ASC X12 will continue to be developed further and will remain of independent importance alongside UN/EDIFACT and new EDI exchange formats.

The newer X12 versions procured on demand by the customers themselves are individually prepared within the scope of maintenance. Please contact us for further information

X12 Module in GEFEG.FX Software

X12 is available as a module for GEFEG.FX. The module contains the following versions:

- X12 002001 ... X12 006040

The newer X12 versions procured by the customers themselves, if required, are prepared individually as part of the maintenance.

Powerful support for EDI tasks with GEFEG.FX Software

EDI managers and teams using the X.12 standard will profit from GEFEG.FX

- as an information source for all directories and X12 message types
- in developing subsets, specifications, or guidelines based on X12
- in developing EDI interfaces and describing them in guides
- in testing EDI messages
- in developing and documenting mapping from X12 to other formats and vice versa
- by visualizing X12 or application guidelines in HTML projects
- in exporting EDI guides to XML for conversion to XML structures such as DTDs and XSDs
- by providing data for translators

Are you interested in using X12?

- Do you already apply X12 or are you interested in using X12 in EDI?
- Would you like to learn how to use X12 with GEFEG.FX?
