## EDIFICE

EDIFICE is the European B2B forum for the Electronics Industry, open for companies with interests in computing, electronics and telecommunications.

The EDIFICE Message Implementation Guidelines (MIGs) are a subset of the UN/EDIFACT standard, based on Directory D.97A, and describe the EDI messages that occur specifically in business transactions in the electronics industry.

In 2004, EDIFICE started with the development of EPIGs (EDIFICE PIP Implementation Guidelines) for those RosettaNet PIPs relevant to the EDIFICE Business scope.

EDIFICE MIGs and EPIGs are being maintained and published using GEFEG.FX. They are available in the EDIFICE Repository, as HTML as well as a print version. The membership has access to the original GEFEG.FX format.

Current and previous versions of the EDIFICE MIGs and EPIGs are also contained in a supplementary data module for GEFEG.FX.

GEFEG mbH has been a member of EDIFICE since 1999.

## Powerful support for EDI tasks with GEFEG.FX Software

EDI managers and teams will profit from GEFEG.FX

- as an information source for EDIFICE MIGs
- in developing subsets, specifications, or guidelines based on EDIFICE MIGs
- in developing EDI interfaces and describing them in guides
- in testing EDI messages
- in developing and documenting mapping from EDIFICE to other formats and vice versa
- by visualizing EDIFICE MIGs or application guidelines in HTML projects
- in exporting EDI guides to XML for conversion to XML structures such as DTDs and XSDs
- by providing data for translators
