RosettaNet

RosettaNet Module

RosettaNet is available as a module for GEFEG.FX.

The module contains 180 PIPs in the following groups:

- Cluster 0: RosettaNet Support
- Cluster 2: Product Information
- Cluster 3: Order Management
- Cluster 4: Inventory Management
- Cluster 5: Marketing Information Management
- Cluster 6: Service and Support
- Cluster 7: Manufacturing

Powerful support for EDI tasks with GEFEG.FX Software

EDI managers and teams will profit from GEFEG.FX

- as an information source for RosettaNet
- in developing subsets, specifications, or guidelines based on RosettaNet
- in developing EDI interfaces and describing them in guides
- in testing messages
- in developing and documenting mapping from RosettaNet to other formats and vice versa
- by visualizing RosettaNet or application guidelines in HTML projects
